Part 573 Report

Date: October 14, 2013

This report serves as notification by Outdoors RV Manufacturing to the National Highway Traffic Safety Administration ("NHTSA") that a motor vehicle safety-related issue exists in certain travel trailer locks supplied by Fastec Industrial Corp., a division of WESCO Distribution, Inc., for installation in the doors of Recreational Vehicles ("RVs"). Additional information concerning the recalled locks can be found in Fastec's Part 573 Report that was separately filed on July 11, 2013 with an assigned NHTSA Recall #13E039.

II. Identification of the Recall Population and Its Size

Type of Equipment:

The product consists of certain travel trailer locks with a keyed paddle handle and deadbolt (the “locks”) installed in the doors of RVs. Only FIC locks that have an integrated deadbolt are affected by this recall. The RVs potentially affected by the recall are as follows:

Brand:	Wind River Travel Trailers & Fifth Wheel Trailers
Model Nos:	Various
Model years:	August 2009 – September 2013.
Body Style/Type:	Travel Trailers & Fifth Wheel Trailers

Brand:	Timber Ridge Travel Trailers

Body Style/Type:	Travel Trailers

Brand:	Black Rock Travel Trailers
Model Nos:	Various
Model years:	June 2013 – September 2013.
Body Style/Type:	Travel Trailers

Total Product Sold:

Outdoors RV Mfg. sold 7,343 travel trailers, and fifth wheel trailers with an FIC deadbolt lock between July 1, 2009 and October 1, 2013. This total includes locks with any key code, not just the subset of 20 key codes that may be affected by the recall.

Current Inventory Estimates:

Outdoors RV Mfg. has reviewed its current inventory of travel trailers, and fifth wheel trailers, and has replaced all potentially affected locks in its inventory.

Percentage of Recall Population Estimated to be Affected:

Outdoors RV Mfg. believes that some unknown subset of travel trailers, and fifth wheel trailers with an FIC deadbolt lock sold between July 2009 and April 2013 may potentially be affected.

III. Description of Issue and Type of Hazard

In September 2013, Outdoors RV Mfg. contacted Lippert Components, Inc. and then Fastec Industrial Corp due to a notice in the RV industry publication, *RV Business*. The notice informed of Fastec Industrial Corp's initiation of a recall due to a jamming issue with some of their RV locks. Fastec Industrial Corp. then confirmed the recall to Outdoors RV Mfg. of the potentially affected locks due to a potential jamming issue with the deadbolt cylinder. If a lock is affected, the key may be able to be removed from the locked door when the key in the deadbolt cylinder is in the horizontal 9 o'clock position, potentially jamming the deadbolt and potentially causing the red lever on the interior side of the lock to become inoperable. In that event, a person inside the travel trailer, or fifth wheel trailer, may not be able to unlock and open the main RV door, but he or she could still exit the travel trailer, or fifth wheel trailer from the emergency exit.

IV. The Remedy Program and Its Schedule

Upon approval of the proposed recall and the recall announcement, Outdoors RV Mfg. will work with Fastec to notify consumers of the recall. Outdoors RV Mfg. estimates that Fastec will issue consumer notifications in the fourth quarter of 2013. Outdoors RV Mfg. will coordinate the recall efforts with Fastec and will refer consumers to Fastec for free replacement of the cylinders in any affected locksets as described more fully in Fastec's Part 573 Report.
